With 3M Scotchtint window films, you can make your home a more comfortable place to be all year-round. 3M Scotchtint window films reduce up to 78% of the sun's heat that comes through windows. By reducing the heat, you can also reduce your air conditioning costs.

For the northern climate and mountain areas, 3M Scotchtint Plus window films can help reduce winter heat loss through windows up to 35%.

Choosing 3M Scotchtint window film for your home is a decision you can be very comfortable with.

The first way we improve light is by removing virtually all its destructive ultraviolet rays, the rays most responsible for causing fading and sun damage. Our Scotchtint sun control films and especially Scotchshield Ultra Safety and Security window films hold your glass in place, helping to protect you and your family from destructive weather and crime.

Our window films even allow you to control the amount of heat and glare that comes into your home through the windows.

To enjoy light, your way, look our way.

When you invite the sun into your home, you shouldn't have to live with fading. Our films keep your home beautiful by reducing up to 99% of the sun's ultraviolet rays.

Unfortunately, there are even more destructive elements than the sun: violent weather and crime. All our window films help hold your glass together when struck. For increased protection, consider 3M Scotchshield Ultra films.

In all kinds of weather, our films have your home covered.
