

## HORIZON ELECTROL®

### View Multiple Image Formats with the Same Screen

- The Horizon Electrol is the first screen available allowing four position masking with the touch of a button.
- Dry contacts are provided on the electronic controller so you can adjust the screen to the factory presets from a properly equipped projector or master control.
- Careful engineering ensures the masking remains flush against the surface of the screen, preventing distracting shadows around the projected image.
- Equipped with a six-button wall switch, you can automatically open and close the screen, halt operation and position the screen into any of the four aspect ratios.

*Matte White fabric will be seamless in all standard sizes.  
Video Spectra® 1.5 fabric up to 8' high will be seamless.  
High Power fabric up to 6' high will be seamless.*

*For optional remote control operation  
see options on pages 40-42.*
