Walk-and-Talk Interactive Panel

Engage your audience and control all panel applications with the remote control

Walk-and-Talk Cordless Lectern

Introducing Walk and Talk Cordless Lectern with Interactive Panel, providing the freedom to present how and where you want.

### A Real Crowd Pleaser

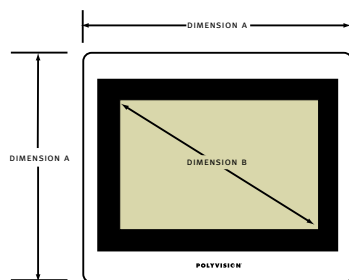

Too often, large group presentations leave audiences flat because they lack interaction and excitement. So instead of plugging your computer directly into a projector, extend the power of your laptop by adding the Interactive Panel. It converts your computer into a robust and dynamic tablet PC, adding interaction to large screen projection. By using its stylus, you can highlight key points, annotate your presentation or capture new thoughts. Or, use the intuitive remote control from anywhere in the room as if

you were still presenting at the panel. With the panel, flat presentations become dynamic.

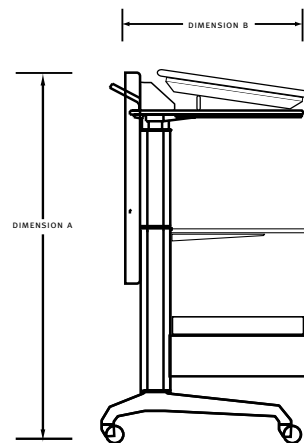

### The Power of Mobility

The Lectern is a one-of-a-kind product that offers presentation freedom. The rechargeable battery pack provides up to ten hours of continuous cordless use for the panel, a computer and one other device. Presenters can easily change locations, freeing them from the confines of a typically fixed podium. It also adjusts to the needs of the speaker, supporting sitting and standing presentations. Escape from the expected, feel free to inspire, and focus on providing a compelling presentation.
