

Adjustable Height Stand For Walk-and-Talk™ Presentation Series

Move
Adapt
Interact

Shown with a
4'x6' Walk-and-Talk Interactive Whiteboard.

Effortless, one-person
height adjustment

Extra-large, easy-glide wheels

No-slide storage basket

Flexibility Never Looked so Good

Sleek, extruded aluminum profiles; jumbo wheels; and a specially-designed storage basket make this stand the ideal combination of aesthetics and application. Durability and elegance are its cornerstones, but flexibility is what makes it so unique. PolyVision is the only manufacturer to design an interactive whiteboard stand that adapts to the height of any user with the simplicity of the common appliance. Unique components in the stand's construction make the board seem light as a feather, so it only takes one person to lift or lower it – making it easy to engage others at the board or to fit under doorframes.

Communication on Wheels

Make your interactive whiteboard mobile for easy sharing between both users and rooms. The stand's extra-large; easy-glide wheels allow the board to roll effortlessly over door thresholds and different types of flooring. Two wheels are lockable to keep the stand from rolling out of place.

Easy Room Transition

The large storage basket accommodates everything from a computer to a load of books. The basket's grid design prevents dust from building as it would on a shelf, so items won't slide in transition between rooms. Its durable, steel construction and 1" lip around the perimeter reinforce the simple, safe portability of materials.
