

Walk-and-Talk™ Flat Screen Module

Impress
Interact
Engage

Highlight key points right on the flat-screen display

Present anywhere in the room via remote control

Attaches to flat panels from 37" to 63"

I Can See Clearly Now

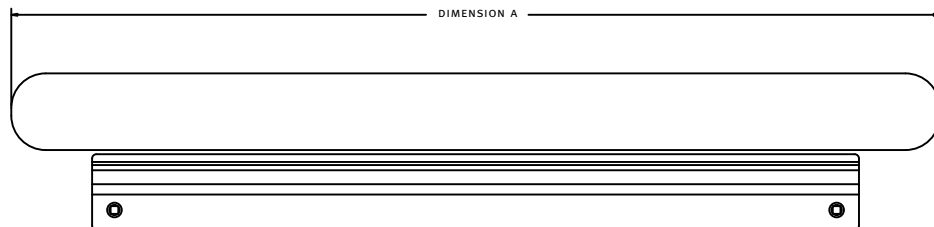

Add full interactive capability and remote control flexibility to your flat screen display with PolyVision's Walk-and-Talk Flat Screen Module. Flat screen displays are increasingly popular thanks to their spectacular image and thin profile; the PolyVision Flat Screen Module maximizes their unparalleled aesthetic, without any oversized bezels or overlays that interfere with the display.

PolyVision's Flat Screen Module turns displays into an extension of your computer. Access files, run applications, highlight key points, and capture new thoughts either from the flat-screen display using a stylus, or from anywhere

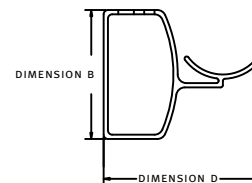

in the room via remote control. Notes are always instantly available, forming a roadmap for your work.

Subtle - valuing the unmatched clarity of flat screen technology - the Flat Screen Module easily attaches to flat panels from 37" to 63" in size.

Walk-and-Talk Flat Screen Module... interactive perfection.
